## Disasterous Fire Wipes Out East Side of Main Street, Sibbald, at Early Hour This Morning

Blaze started in centre of block. Local barber with his wife and child escape from burning building in their night attire.

A fire which demolished the east side business block in Sibbald, broke out this morning in the premises of the local barber, shortly after 2.30 a.m. Awakened by the cries of their six month old baby, Mr. and Mrs. Josie Hulbert made their escape from the burning building in their night attire and started to alarm the inhabitants. As the residents of the hamlet turned out, it was seen that nothing could be done to save the block and efforts were directed to saving the west side of the street, and the lumber yard which was situated immediately east of Main Street, as well as assisting in the work of salvaging whatever was possible from Scott's general store and Mower's hardware store.

Splendid work was done in saving the lumber yard by a bucket brigade, whose only source of water supply was from hand pumps on private wells round the hamlet. The properties demolished are: The hotel, Scott's general store, Chinese restaurant, Barber shop (with first floor residence).

(Concluded on page 12)

**M. D. of Cereal**

The council of the Municipal District of Cereal No. 212, met in the municipal office at Oyen, on Wednesday, March 13, at 10 o'clock a.m.

All councillors present.

Alf Gibson was elected Reeve for the year and J. E. Werry was elected Deputy Reeve for six months.

The minutes of the council meeting of February 9 and the financial statements for the month of February were read and approved.

The correspondence was read and dealt with.

The Reeve and Secretary were authorized to sign all cheques and other documents that require to be signed for Municipal District.

The remuneration of councillors attending meetings and inspecting road work was set.

The Reeve and Secretary were authorized to make the March school payments.

The council decided to hold a sale of lands under the Tax Recovery Act on Saturday, May 15, 1920.

Mr. A. L. Stevens C.A., of Calgary, was appointed Auditor for 1920.

The council was appointed a local board of health and each councillor was appointed fire guardian in his own district.

The council agreed to sell the N/16-27-5-4, and the N.E. 9-27-5-4 to J. M. Eaton.

The S.W. 34 26 6-4, was sold to H. R. Knight, on a lease agreement.

The Secretary was appointed Assessor for 1920.

J. E. Werry was appointed representative to the meeting of the representatives of the Municipal Hall Districts.

The Secretary was instructed to attend the Cereal Office the first and third Thursdays of the months of September, October and November, and the first Thursday of each month for the balance of the year.

The council purchased gopher poison from G. A. Morrison and H. J. Howey.

The accounts were passed.

The secretary was instructed in regard to the cancellation of taxes, seizures etc.

The council adjourned to meet again on Saturday, April 13, at 10.00 a.m.

### R. F. Scott, New Inspector of Schools for Oyen Inspectorate

R. F. Scott, principal of McKay Avenue School, Edmonton, has been appointed Inspector of Schools for Oyen Inspectorate, succeeding the late F. L. Aylesworth, whose death occurred last November. Mr. Scott, who has occupied his present position for ten years, has had twenty-one years teaching experience and is well qualified for the new duties he will take up. He arrived in Oyen Monday.

## Parent Education

Tracking Down Tips How To Become Successful Parents

One is so accustomed to hearing about the education of children that it is new news almost as a shock to learn that adult Winnipeg has taken a new branch of study, known as "Parent Education."

Popular lectures from the "class" in which daddies and mothers come as pupils, and they have "homework" too, the most interesting of homework, for it consists of trying out on their own offspring, the lessons they learned at "school." And the sole and only purpose of that school is to teach them how to be "successful parents."

"And why not?" demanded an official of the Winnipeg Health League when asked about it. "In this age of specialization, when a professional man has to study six or seven years before beginning to practise, why shouldn't there be a special training available for those who take on one of the most important duties in society—that of parenthood?"

"We want to teach people simple sound, common-sense things about children—nothing faddish you understand, or complicated. We want to teach-and-butler facts that parents should know if Canadians of the next generation are to be as healthy mentally, mentally and physically as it is possible to make them."

Prominent Canadians from time to time have expressed themselves very strongly upon this theme. A synopsis of their writings shows that the trend of opinion amongst thinking people is emphatically in support of the idea.

Judge H. S. Matt, of the Juvenile Court, Toronto, says: "Parents are very much in need of assistance in parent education. I think it should start before marriage."

Judge Emily Morley: "Educate parents if you can. It should be attempted by all means."

The Most Reverend Archbishop Neil McNeil, Toronto: "A knowledge of the duties of parents and the way of treating children should begin at the time of marriage."

Dr. Margaret Dutton, Judge of Women's Court, Toronto: "There is no question regarding parent education. It should start with the grand parents when possible, but certainly with the parents as children."

Dr. James L. Hughes, former chief inspector of schools, Toronto: "I believe that parent education should start in high school. 'The best thing I can suggest' is the preparation of a book on true child development and the passing of a book that the groom in such marriage should produce the book at his wedding with his name on the title page."

Hon. L. A. Davis, Quebec: "I believe that parent education should start before marriage."

Hon. William P. Roberts, M.D., former Minister of Health for New Brunswick: "Yes, at twelve years of age."

Judge J. P. McKelvey, of the Ottawa Juvenile Court, agrees that parent education should start at twelve.

Professor Peter Sandford says that every parent should be a child psychologist. "Seventy years ago Spencer pointed out that we train people as if they were never to be the parents of children," he says.

**Lepers Are Long Lived**

Longevity of lepers is shown in a report submitted by the territorial board of health to the Governor of Hawaii. Of 322 lepers at Kalaupapa settlement, fifteen have lived here from forty to forty-nine years; thirty from thirty to thirty-nine years; thirty-six from twenty to twenty-nine years, and 121 from ten to nineteen years. Infrequency of leprosy among members of the white race is also indicated.

## Would Abolish Revolver

American Prison Association Revolver Would Lessen Crime

The American Prison Association, which has been holding a convention recently in Kansas City and has taken as one of its main topics the abolition of the revolver, except in time of war, and called upon the state legislature to pass laws making it illegal to manufacture, sell, possess or use a revolver, except in connection with a bona fide business, and a law making it illegal to carry a revolver on one's person.

The resolution is supported by the customary whereas, one of which states that many crimes would be prevented if the revolver were abolished. It is further stated that "it has been demonstrated in England and elsewhere that the possession of a revolver by law enforcement officers is not indispensable to maintenance of law and order."

The association apparently has no notice of the needs of the writers of detective yarns, or still more poignant, those of scenario projectors. One would gather from the unconvincing evidence of the screen that in the drawer of the drawing-room table in every well-to-do home reposes a loaded revolver. It is going to be awkward if "they make a law."

As it is in Canada, persons must have a permit to number revolvers among their possessions. The police may carry them at night, but it is illegal for them to be carried in the use of them.

Certainly the first whereas of the association is the strongest, but it is an open question whether such prohibition as that suggested would diminish those intent upon crime of the revolver, or whether it might increase it.

It would work with those just starting, but with that could be accomplished with a strong administration of the penal system.

Under the present law, the manufacture was forbidden over the whole continent or several continents the central intent being to prevent the society could be used to secure his weapon. The association is holding its meeting this year in the autumn.

Toronto, General W. S. Hughes, superintendent of Penitentiaries, Ottawa, was one of the speakers of the "Kalaupapa" report.

From the report of the proceedings, made an excellent impression, both personally and by his presentation of the Canadian system.

**Many Words Borrowed**

Language Spoken In Garrope Of Several Tongues

Britain has borrowed many foreign words to make up its language. Each year a collection of new words are culled and incorporated in the up-to-date dictionary says an article in Pearson's Weekly.

There are a good many languages spoken in the garage, though the fact that many have passed into the English dictionary.

"Garage" itself is French and comes from the word "garage," which is related to "garret," which meant, in old days, a turret or watch-tower, and with garriation, in France, is used in connection with shutters on the railways.

The word "motor" is, of course, from the Latin movers, to move, like its brother word motion.

The "engine" implies ingenuity—both words are from the Latin ingeniū, meaning wit—and skill and natural ability.

"Chassis" is French from chassis, which also gave birth to window sash, or sash, as it is used to be spelled, and the meaning is a frame.

"Fire" suggests a gun, and, properly, a gun. The word "fire" is derived from the wheel comes from the French tirer, to put on or to, to tighten; there are many kindred meanings.

"Jack" is literally a Jack-of-all-trades word. It is a diminutive of John, and is often applied to contrivances replacing a servant, as in the case of the jack, or the mechanical device which motorists use for hoisting.

"Reaper" remains rather mysterious—it is probably a survival of an old word for curb or bullock, and so something to curb, or bring to a stop. Clear, in its original, is considered any equipment—a man's clothes, harness for a horse and so on; applied, as it is now, to a series of interlocking wheels there is the suggestion of an equipment ready to use.

"Steering" takes us back to the Anglo-Saxon steora, more than half the ruler of a ship. "Wheel" is also from the language of our forefathers.

For One—"And no you liked from Vancouver to Miami in three months."

Second—"Yes, I should have made it in two months, but I had to walk ten miles."

## Needs Many Assistants

Cleaning Boots In Large British Hotels Is Big Job

The superintendent of the boots in a British hotel has a big job on his hands, and has a quite a corps of assistants. In the busy season he may be responsible for the cleaning of two or three thousand pairs a day.

It is no uncommon thing for a wealthy couple to arrive at a fashionable hotel from the Continent, with their boot-trunk crammed with various types of footwear.

All kinds and colors! Grey boots, green boots, brown boots and boots in delicate shades of mauve and blue. These must be handled with extreme care! Boots and shoes of shark skin, of alligator skin, of snake skin, of lizard skin, and most expensive of all—boots made from the beautifully mottled hide of the sea leopard.

For the proper treatment of all these triumphs of the shoemaker's art the Master of the Boots is responsible. He is the task of selecting the tinner, chaffer, creamer and varnisher, and of seeing that they are used correctly.

His work experience has made him an artist in color. His fawing and greys will be of exactly the same shade as the original, his blues and greens of proper brightness.

His work starts about ten o'clock, and goes on all through the night. Day and night he employs at least one of the many pairs of boots and shoes dealt with during this period passes through five or six pairs of hands before finally being sent upstairs to the floor valets, to be deposited outside the doors of their owners.

**In Memory of General Wolfe**

Canadian People To Place Statue In Greenwich Park, London, England

Down in the archives at Ottawa there is a pair of baby shoes mended as once the proud property of a tiny boy who grew to be General Wolfe.

A handsome memorial to this man who paid for his life to build a nation and died "contented" towers upon the Plains of Abraham, the redoubt of curious chabranic loads of tourists.

Mostly these tourists are from across the border. It is all the baby shoes mended, and it is a different thing with the Canadians who fall into reverie there as they see their physical eyes the actual cove, the actual heights, that stand out in the memory no matter how old history lessons have faded.

By the same token Canadian visitors to Westminster Abbey seek out Wolfe's memorial there.

There is no doubt that the Canadian people's love for their life-shrine. By gift of the Canadian people a statue is to be placed in Greenwich Park, London, England.

It is said the first footsteps over Wolfe's victory were much keener in New England than across the sea. To those in Great Britain Canada was then little known and less regarded, but the American colonies were as a neighbor. Canada was then a part of the British Empire.

A long way through history and on to the end of recorded time have wandered and will wander the pair of baby shoes—Free Press.

**First Advertised Ice Cream**

The first ice cream advertisement in history appeared in the New York Gazette, on May 19, 1777, it has been established through research work by the New England Association of Ice Cream Manufacturers.

Inserted by one Philip Lunz, styling himself "a confectioner from London," the advertisement stated that the new delicacy might be had at his shop "almost every day."

**Claims Oldest Parking Law**

Kingston claims to have the oldest "vehicle-parking" bylaw in Ontario. In the latter part of 1810 the magistrates who governed the place decreed "that carts and carriages be left in the streets shall be arranged along the sides in regular manner, on a penalty of five shillings."

No one was allowed to race or run horses on the street, on penalty of five shillings.

Ratifying Vendor—"I say, mum, 'ave you got such a thing as a match, you could give me?"

Kind Lady—I haven't one in the house.

"Well, will you buy a few boxes? I sell 'em, mum!"

## See Floor Is Treasure House

No Doubt Many Valuable Things Drugged From Floors

Seven landmen realize that there are reads and lanes on the sea, as clearly defined and consistently used as those on land. The sea-lanes are steamed over by thousands of ships each year and would disclose some interesting stories.

After the coming of steam and the inauguration of definitely planned routes east and west, the cinch and other, heavy crockery, old iron, unneeded ballast and all the rubbish that is thrown overboard, must have begun to pile up along the three thousand miles of ocean floor.

On all coal-burning ships ares are dumped overboard each "watch"—that is, every four hours, but the creating use of oil fuel is lessening the amount of cinders that go overboard each day.

Canneries and ships are not the only things that are dumped. Tin must be there in millions, broken fire-arms, by the ton, chairs, bowls, marlinbones and loads in thousands. To these must be added crockery and glasses—hundreds unbroken and accidentally damaged, hundreds of pieces that are the result of everyday breakages, carelessness and the careless smashing during a sudden storm.

Perhaps, too, among the glistening china or the twinkling glass that are lying on their bellies in thousands, might be lucky enough to find a ring, bracelet or necklace dropped overboard by some luckless passenger. What a treasure house, if only we could explore it!

**Break Record**

Frank Dupuis established a world record but lost the race. He established his record when on the first day he covered the initial 41 mile lap of the Eastern International road race, at Quebec, in 3 hours, 22 minutes, 42 seconds. On the two succeeding days, however, Sepala, veteran Alaskan mariner, succeeded in overtaking the lead and carried off the honors, but Dupuis' time for the first day has never been exceeded.

**New Settlers Open Big Area**

Tremendous Development Taking Place In Western Canada

Indicative of the tremendous development which has taken place in Western Canada, and the large part being played by incoming settlers in that development, the land settlement officials of the Canadian National Railways in the west estimate that the total amount of land broken and prepared for crop during 1928, in the territory tributary to the main line, was 750,000 acres, compared with about 500,000 acres in 1927. In addition to this, some 200,000 acres were cleared of brush and prepared for breaking during the coming season. The significant feature of this increased farm development is the fact that the new land was broken by incoming settlers, recruited and directed to locations by the Dominion Department of the Railway Company.

**Millions For Newspaper Space**

Louis Wilby, business manager of the New York Times, gives some interesting figures in regard to advertising. Last year while \$25,000,000 was spent for radio, \$75,000,000 for outdoor publicity, and \$177,000,000 in magazine publications, \$300,000,000 were spent for newspaper space. No less than \$800,000,000 was paid for newspaper space. These are striking figures, and show the trend of the times.

**Trades Car For Coffee**

The proprietor of a cafe at Rover's Hotel informed a tourist customer that he admired his little car, and was told it could be bought there and then cash down. He had left the money on him, however, and the banks closed. "Very well," said the customer; "instead of cash, I'll take, payable on demand, cup of coffee. Ten thousand of them!" The bargain was struck.

"So you are going to emigrate to Australia! What do you mean to do there?"

"Take up land."

"A shovelful at a time, to start with, I expect."

## Place Of Wheat In The Diet

Ever Capita Consuming Appears To Be Increasing The World Over

Wheat now contributes one-fourth of the calories of the American diet. According to the Food Research Institute, of Stanford University, California, it is still the outstanding single staple foodstuff. In most southern European countries wheat contributes a larger proportion of the total calories of the diet than in the United States; but in countries where rice or millet is the staple cereal, its contribution is smaller. Its nutritional importance in the United States is primarily in the starch content, not in the content of protein, mineral elements, vitamins, or roughage.

To consume wheat as whole wheat bread instead of white bread would make no essential contribution to the national health, and would not be a national economy at least so long as the present American diet continues to prevail. Protein, minerals, vitamins, and roughage are adequately available in other foodstuffs and need not be sought in whole wheat bread. Nutritional value is not the only reason why wheat is sought in the milk supply, or perhaps more than an eighth of the milk supply is secured from milk.

Wheat is one of the most important of all crops. It is the staple of the supply of mill officials, with attention shifts of feed-crop production scarcely appear adequate. Only in such countries as India and China, where the diet is little diversified, are nutritional or economic advantages to be secured by consuming wheat grains rather than highly milled grains.

Wheat now ranks as one of the cheapest foods. Per capita consumption appears to be increasing in the world at large, but not in the United States. In the United States, however, it is little reason to anticipate increased per capita consumption, but the economic appeals on behalf of producers.

**See-Keeping In The Peace River District**

Fair Success Attends Recent Experiments Carried On

See-keeping is being given a trial at the Peace River Experiment Station, in the Peace River District. With proper care, the birds will winter in good condition, where provision has to be made against spring dwindling, owing to protracted cold weather and a lack of early snow yielding plants. Packages of two pounds each were imported in the spring from Alaska. These were hired on drawn foundation and old moderately well. The colonies thus obtained, along with those wintered at the station, were banded during the season for extracted honey.

According to the superintendent in his report for 1927, the yield of honey amounted to 108 pounds per colony. The largest single colony, which began the season as a two-pound package shipped in from the south, yielded 220 pounds for the season. The season of highest yield was in the month of August, when one twenty-four hour period 12.5 pounds of honey were gathered by a single colony. This was chiefly from young clover bloom which was the main honey crop at the station.

**New Cereal Introductions**

During the past three years the Cereal Division of the Dominion Department of Agriculture has introduced for trial in field areas by farmers two early-maturing varieties of spring wheat, bearing the names Garnet and Reward, a heavy-yielding variety of field peas known as Mackay, and a strong-strawed two-rowed variety of barley known as Duckbill Ottawa, No. 57.

He: I suppose I'm only a pibble on the back of your life?"

She: That's true, but you might stand a chance if you were a little boulder.

"This is a real Velasquez."

"How do you know?"

"By the bill."—Eugene Humor, M.D.

## How Sweet

The chief confectioner of the Canadian Pacific Liner "Empress of Scotland" decorated the buffet of that ship's dining saloon, by making a scale model of the 25,000 ton liner, entirely of sugar. Light chine through the green and red port and starboard lights indicate that she is under steam. Harry Astley, designer and builder constructed the ship in his spare time—spread over five days—and is planning to enter a scale model of the New Canadian Pacific Hotel, in Toronto, the Royal York, at an exhibition in London to celebrate the twentieth anniversary of the Canadian Hotel Association, in New York. These little ships are in the little American Chambers—which is absurd, because Harry, like Canadian Pacific sailors they are on the bridge or in the bakery, is from Liverpool.

For One—"And no you liked from Vancouver to Miami in three months."

Second—"Yes, I should have made it in two months, but I had to walk ten miles."

For One—"And no you liked from Vancouver to Miami in three months."

For One—"And no you liked from Vancouver to Miami in three months."

Second—"Yes, I should have made it in two months, but I had to walk ten miles."

Anderson returns to an "Inebriates Home" drunk.

Warder: "You will be punished for being drunk."

Anderson: "How was I to guess that you had to return to an 'Inebriates Home' sober?"—Karlkatun, Oslo.

W. N. O. 1777.

## RADIO MAY AID MAN

## IN STUDY OF WILD LIFE

**Do animals converse?** Harry Allen, famous New Brunswick guide says they do and he speaks from the experience of a lifetime spent in the woods where he has seen seventy-eight miles down the Gains River.

Within certain narrow limits, he insists, the language of the wild is understood by man with such skill that it deceives the animals themselves. Thus, the call of the coyote in the mating season is more often than not a successful lure in bringing the ball to the hunter. The bark of the migrating wolf and the cry of the howling goshawk are easily imitated by the initiate and are easy of interpretation. There is, however, nothing particularly new in this. What is new is Mr. Allen's claim that animals communicate with one another by sounds inaudible to the human ear. That they do converse and communicate one another is demonstrated in a thousand ways each day. What our well-known guide suggests is that radio will eventually solve the question and be the means of interpretation of the animal communication.

That the human ear is sensitive to but a very narrow and limited range of vibrations is in fact proven. What Mr. Allen hopes to prove shortly is that all animals are sensitive to, and make use of,

"wave lengths" outside the range of mankind. "It is a common occurrence in the woods to see a coyote moose leave her calf or a deer bear farm," says Mr. Allen by way of example. "I have seen it hundreds of times. Every time the mother animal has instructed her young, in a language inaudible to human ears, not to stray. That language was quite intelligible to the young, but although I have sometimes been within touching distance, I have never heard the faintest sound, beyond at most, the blowing out of air from the nostrils which had no apparent significance. The young of the moose or deer will remain exactly as its mother left it, even though she be gone for half an hour at a stretch. More than that—in case of extreme need it will 'radio' its mother without apparent sound."

"I have experimented on the problem many times. In each case it has been the same. I have waited until the mother has gone some distance; then have approached and stroked the young animal. Beyond a slight twitching of the skin, it has not moved, but it must have sensed a call, for almost immediately I would hear the thumping of the mother through the undergrowth. At moments I would not pursue my investigations further."

Mr. Allen has cited many other examples of this to members of the Tourist Department of the Canadian Pacific Railway who are endeavoring to develop his theory still further as he engages in the role of guide, philosopher and friend to the fisherman and the hunter.

## M. D. of Bertawan

Minutes of Council meeting held at Sibbald, on Wednesday, March 13, 1929, at 2 p.m.

Councillors present: Daibel, Hunter, Jones, Mowers, Musser and Wilson.

Daibel—That Councillor Wilson be Reeve.

Jones—That Councillor Mowers be Deputy Reeve for first six months.

Jones—That W. Linklater be Secretary-Treasurer and that the salary be \$1000.00 per annum.

Mowers—That Councillor Jones be Inspector of Penitents.

Mowers—That the Reeve, Musser and Daibel be Finance Committee.

Daibel—That the Councillors for Divisions 1, 2, and 6 be read committee for the three South divisions and the councilors for 3, 4 and 5 for three North divisions.

Mowers—That Dr. Whaley be M.H.O. for the east half of the municipality, and Dr. McGrogan be M.H.O. for the west half, the retaining fee to be \$100.00 in each case.

Mowers—That Jones, Hunter and Daibel be Health Board.

Musser—That the regular meetings be held on the first Saturday of each month at 2 p.m.

Jones—That A. L. Stevens, C.A., of Calgary be auditor for the ensuing year at \$175.00 for the audit.

Daibel—That the Reeve and Secretary and the Deputy Reeve and Secretary, in absence of the Reeve, be authorized to sign cheques etc., when same have been passed for payment by the council.

Daibel—That the Reeve be the official delegate to the Hall Board convention.

Jones—That the Secretary prepare a road map of not less than 4 inches to the mile showing main roads, market roads, etc., so that the council as a whole might be better able to follow the work being done by each individual councillor.

Jones—That the former motion, appearing on the Minute Book relating to the cancellation of debts and credits on road work be cancelled and that all debts and credits for each division be carried forward from year to year.

Mowers—That the payment to councillors for attending meetings and road supervision be according to the scale allowed in the Act, viz.—\$4.00 per day and 10 cents per mile.

Daibel—That the application of Mrs. Louise Cresswell of Ben ton, for a pension under the Mother's Allowance Act, of \$20.00 per month be approved.

Daibel—That a cheque be issued to the Department of Municipal Affairs for the following amounts to pay off the Seed Grain indebtedness against the West half of 20-23-3 viz—Seed Grain, \$333.77; Relief, \$21.00; and after applying balance of the payment \$140.61 to the outstanding taxes owing on that land, that the balance of the taxes be cancelled.

Daibel—That we purchase 2.8 ft. road maintainers at a cost of \$275.00 each.

The accounts submitted were discussed and on motion of councillor Jones the following were passed for payment: T. C. Scott, rent of hall, 10.00; T. C. Scott, Conway relief, 11.00; Beaver Lumber Co., 6.00; Beaver Lumber Co., 21.80; W. Hartwell, 5.00; Express, 1.40; Hale and Hale, 10.35; Alaska News, 18.00; Oyen News, 30.35; G. B. Speer, 2.10; J. H. Puley, 3.90; Dr. Whaley, 90.00; Attorney General, 172.50; Western Municipal News, 65.23; Paysheet, Division 4, 334.75.

Moved by Wilson that meeting adjourn.

W. Linklater, Sec. Treas.

# Largest Single Item In The Dominion's National Wealth Is That Of Agriculture

The aggregate national wealth of Canada for the year 1928, was \$28,081,482,000, says a report issued by the Dominion Bureau of Statistics. The figure is exclusive of undeveloped natural resources. Similar estimates placed the total wealth for 1925, at \$25,073,714,000, and for 1921, at \$22,190,000,000, "though these figures are not exactly comparable in view of certain improvements and additions made in the method of valuation," the report points out. The figures, however, can be taken to indicate an increase of about \$3,000,000,000 for the twelve months under review over the previous like period, and approaching an advance of \$3,500,000,000 in the five years 1921-26, the report continues.

The largest single item in the Dominion's national wealth for 1928, was land for agriculture, which reached a total of \$7,817,715,000, or 28.28 per cent. of the entire amount. This figure includes the value of agricultural production for the year.

The second largest element was urban real property, which reached a figure of \$7,081,735,000, or 25.21 per cent. of the total.

As regards the provincial distribution of wealth, Ontario ranked first, with estimated aggregate wealth of \$9,130,188,000, or 34.2 per cent. of the total, and Quebec second, with estimated wealth of \$6,656,108,000. The western provinces came first in per capita wealth, however: British Columbia, with \$5,559; Alberta second, with \$5,841; Saskatchewan fourth, with \$5,257. These figures may be compared with \$2,902 and \$2,258, the per capita wealth of Ontario and Quebec, respectively, and \$2,842, the per capita wealth for the whole Dominion.

By provinces, the estimated wealth was:

Prince Edward Island, \$145,745; New Brunswick, \$223,092,000; Quebec, \$6,656,108,000; Ontario, \$9,130,188,000; Manitoba, \$1,889,600,000; Saskatchewan, \$2,920,739,000; Alberta, \$2,192,067,000; British Columbia, \$2,188,316,000; Yukon, \$12,478,000.

## Rush For Homesteads

Hundreds Of Homesteads Taken Up In Three Prairie Provinces This Year

From the point of view of new homesteads taken up the year 1929 has got off to a good start. January saw 761 homesteads filed upon, as compared with 457 for the same month last year—an increase, however, of two-thirds in favor of the present year. Alberta led the list with 386, as compared with 201 for January, 1928; Saskatchewan followed with 269 as against 194; Manitoba came next with 42 against 51, and British Columbia last with 24 against 31.

## Object Had Vanished

The class had been told to bring things to school for drawing lesson, and just as the lesson was about to begin, a small boy was found standing tearfully at his teacher's desk. "I've mislaid my object," he explained.

"What was it?" asked the teacher anxiously.

"A banana," replied the would-be artist.

Products produced from the forests of Canada have an annual value of about \$145,000,000, of which approximately \$400,000,000 is distributed for labour, equipment and supplies.

Teacher: "Can you say to me an old saying that is now out of date?"

Moses: "Yes, sir! Honesty is the best policy!" —Humoristic Listy, Prague.

W. N. U. 1777

## Indian Wedding

The ancient marriage rites of the Stoney people were exemplified when Chief Bear Paw and his minor chiefs united Miss Sylvia Hainstock-Cate, of Hilderburg, Holland, to Mr. Louis Lantieri, of Vancouver. Immediately after the picturesque Indian ceremony which took place on the Bow River at Banff, the couple were again married according to the rites of their own church. Bear Paw is seen placing the eagle feathers, emblem of faithfulness, on the groom's head and bracelet on the wrist of the bride.

## Prefers Rural Life

Ontario Man Says Farmer Is His Own Boss

In a letter written to the Farmer's Advocate, "Digit," of Perth County, Ontario, disposes with an assertion that those who live on the farm do so because they cannot tear themselves away and are willing to lose money on the farm rather than draw a hundred a week in the city. He says: "I know of several offices in the city where I am welcome to go on the pay roll at any time. I have tasted some of the joys of city life and at a good salary. I came back to the farm for two reasons: First, I could earn more money and have more left when the year was up; and, second, there is not the worry and incessant demand of attention to business on the farm. As to the first, a week, I met a couple of men who received that amount. I met a hundred who were competent and successful farmers, but had gone to the city, and only three or four were getting over \$500 a week; they could have done as well had they stayed on the farm. Foolishly, we forget what it costs to live in the city."

## Fertilizing the Strawberry Bed

Fertilizers Should Be Applied In The Fall For Best Results

While fertilizing the strawberry bed in the spring may increase the size of the fruit it does not increase the number of fruit buds in the plants. Investigations carried on by St. R. K. B. of the Division of Horticultural Division of the experiment station in the United States, that to increase the fruit buds, fertilizing of the patch requires to be done in the fall of the year. An account of the work published in Bulletin No. 110, of the Department of Agriculture, at Ottawa, shows that the highest yields of fruit were secured when the fertilizer was applied on September 15th, of the first year, and of August 15th of the second fruiting year. These dates, it was learned, are quite close to the beginning of fruit bud differentiation as determined by microscopical studies carried on with the young plants.

## In Need Of Publicity

New York Paper Has Queried Idea About Vancouver

Vancouver, which is vying some \$80,000 this year for publicity purposes, might spend a few dollars of it New York to let New York know there is such a place. A New York paper, in alluding to Percy Williams' feat, says: "The young Canadian is a sensation, and well he might be, as he stepped from the backwoods of Northwest Canada into fame with a dual victory at the 1928 Olympic games." Evidently Vancouver has still a lot to learn about putting her name on the map.—Victoria Colonist.

## Opinion Has Changed

The change has taken place in the mental attitude of the people of Canada toward its vast northwestern area is simply amazing. At the present time it is admitted on every hand that this territory is no longer a barren wilderness, but a region packed with innumerable potential wealth, which only awaits enterprise and capital for its development.

## U.S. Destroyers To Visit B.C.

The United States Government proposes to send six destroyers to visit British Columbia ports during the summer of 1929. Three of these vessels will be at Victoria, and three at Vancouver from July 31 to July 15. Announcement to this effect was made by Hon. J. L. Fialson, minister of national defence.

Now that a motorcycle has ridden along a tight rope it would seem that tight ropes are no longer safe for pedestrians.

Birds have the most remarkable memories of all wild life.

# Make Soil Surveys For Establishment Of Agriculture On A More Scientific Basis

## Fruits Of British Columbia

Almost Every Variety Of Fruit Now Grown On Pacific Slope

Most fruits except those indigenous to the tropics or sub-tropics, are now being produced in British Columbia. Apples, apricots, cherries, peaches, plums, prunes, nectarines, grapes, loganberries, raspberries, strawberries, grapes, almonds and other less hardy fruits and nuts are now grown commercially. The principal crop is apples, the production of which has increased in the last 17 years from 220,000 bushels to over 3,000,000 bushels.

Recent experiments have shown that some districts of British Columbia are likely to become notable as producers of fruits, nuts and crops that have hitherto not been grown in the province. Flowering bulbs are now being grown profitably.

Co-operative marketing is largely practised by fruit growers and farmers generally. A large percentage of fruit produced in British Columbia is exported to distant markets, including Great Britain, the Orient and Australia. A horticultural branch is maintained by the Provincial Government to assist the industry.

## Mistreating The Heart

Few People Pay Attention To Warning Of Trouble

Take care of your heart. You have only one. Give it a huge amount of work to do and it does it without telling you how you are mistreating it, but when it does rebel and tell you, pay attention to the warnings.

These are some of the evidences of a worn-out heart: You are short of breath on exertion that had not previously produced distress. You may notice that your shoes are tight in the forenoon, but that you have no difficulty in putting them on the next morning. Then one day you take cold, the next day you are short of breath, you have a distressing cough and your feet are swollen.

As soon as the symptoms are relieved the average person wants to get up rather than to go about slowly and gradually getting back to his usual activity. It would not be unmitigated bad fortune for a person with a bad heart to have a broken leg.

## Just Ordinary Business

Certified Cheque For Large Amount Nothing To Offend By

Engineering a very special matter to business involving the issuance of a hundred thousand dollars, a lawyer decided that a certified cheque would be as satisfactory as a cashed note. He then drew the cheque payable to "Bearing." He took it to the bank and great most of an hour with an official arranging for the rate delivery of the paper to his office, for, as soon as the bank certifies a cheque to "Bearing" it is cashable by anybody, anywhere. It was arranged that the cheque was to be sent by a clerk, accompanied by an armed guard. The gentleman, relieved by the precautions mapped out, went to lunch. When he returned to his desk the office boy looked up. "A couple of fellows brought a cheque for a hundred grand for you a while ago," he announced. "I put it in the basket with the rest of the incoming stuff."

## Maintenance Of Roads

Much Time And Attention Devoted To Protection Of Roadways

Well-constructed highways are necessary in Canada to meet the insistent demands of traffic, but well-maintained roads are even of more importance in the interest of economy. Consequently, provincial road authorities, engineers and engineers are devoting a great deal of thought and attention to the care and protection of roads. In 1927 the mileage of roads under maintenance in Canada under the patrol or gas system was 44,416 miles, at a cost of \$15,024,617.

## Killed Americans

Americans who insist on wearing the kilt while visiting Scotland are committing such a common sign that the people pay little attention to it. In the past some of the costumes worn by the visitors have been so long that true Caledonians shuddered, but apparently they are becoming accustomed to the way foreigners wear the plaid.

As much as \$50,000 may be spent on a customer installed in the best movie houses.

No. 341—Simulates Two-Piece Model. This style is designed in sizes 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100,
